

We cordially invite you to attend the **Symposium on**

**“Dendritic Macromolecules as new functional materials:  
synthesis, properties and applications”**

to be held within the **E-MRS Spring Meeting 2005** in  
Strasbourg (France) from May 31 to June 3, 2005

The topics which will be covered in this symposium include:

1. synthetic approaches for both dendrimers and hyperbranched polymers
2. characterization studies;
3. structure-property relation ship in highly branched systems
4. dendritic architecture and self-assembly
5. dendritic polymers in catalysis
6. dendritic polymers in nanotechnology
7. dendritic polymers in biology, biotechnology, pharmacy and medicine
8. dendritic structures in coatings and resins (networks)
9. dendritic polymers from the industrial point of view
